

## Module 2: Introduction to Climate change policy and context

**Group Activity:** What actions can planners take to adapt to and mitigate against the impacts of climate change?

### Step 1: Spatial Levels

Working as a group and using your ideas and the experience from within your group complete the grid on the template with examples from your table and add others you can think of. When you have exhausted your ideas please indicate to the trainer.

### Step 2: Statement Cards

As a group consider the statements on the cards - place the cards provided where you think they should go and discuss your choices.
