

## **Module 6: Achieving climate change mitigation and adaptation in masterplanning**

### **Group Exercise 1**

#### **Design your own Climate Change Checklist**

Work together with your group to design a climate change checklist to form the basis of pre-application discussions about masterplans.

This checklist is also to be completed by design teams, and returned with their planning application.

Include questions under the following headings that can be answered Yes / No

1. Location and transport
2. Site layout and building design
3. Energy
4. Sustainable drainage systems (SUDs)
5. Water conservation and recycling
